eScription One
Required InSync Upgrades

Action Notice

Action Required

To ensure security and optimal application functionality, DeliverHealth is requiring users to update to the latest versions of all eScription One applications, including InSync. We will discontinue support of outdated versions, which will prevent users from logging in. To avoid disruption in service, please ensure all machines have been upgraded to InSync v6.15.23228 (or higher after new versions have been released) by **December 31, 2023**. We appreciate your cooperation and support.

Application Download

https://www.escription-one.com/Software/InSync

NOTE: For managed systems, an MSI installer can be downloaded from "Other Links of Interest" at the above website, or by copying the link for latest version installer, then change the URL to end with "MSI" instead of "exe".

Minimum Supported Version after December 31, 2023

InSync v6.15.23228

Minimum InSync Application Requirements

– Operating system: Windows 10

– RAM: 4 GB or higher

– Processor: 1 GHz or faster

– .NET Framework 4.7.2 or higher
