

DeliverHealth

eSOne Mobile for iOS v3.46.17

Release Notes

What's New?

DeliverHealth is excited to announce the release of eSOne Mobile iOS v3.46! This update brings enhancements to the inpatient encounter list, providing clearer and more intuitive information at a glance.

Inpatient List Update

The inpatient list now displays admit and discharge dates for each patient encounter.

 **Admit Date Display:** The admit date is now accompanied by an icon of a patient walking in, making it easy to identify when a patient was admitted.

 **Discharge Date Display:** If a patient has been discharged, both the admit and discharge dates will appear, along with a patient walking out icon for the discharge date, allowing you to quickly see a full timeline of the patient's hospital stay.

This visual enhancement provides a more efficient way to track patient movements in and out of care, giving you quick and clear access to important patient encounter details.

Application Requirements

- Any iOS device with iOS 15.2 or greater. Open 'Settings' and tap 'About' then 'Software Version' to confirm that the OS installed is version 15.2+.
- Internet Access through a wireless Local Area Network (LAN) connection or through a phone service provider. It is strongly recommended to use a Wi-Fi LAN connection when uploading dictations. Minimum bandwidth: LTE/4G data connection; recommended is stable Wi-Fi.
- Communicates over port 443 to <https://mobile.escription-one.com> using TLS 1.2.
