

DeliverHealth

eScripture One InScribe v7.12 Release Notes

What's New?

DeliverHealth is pleased to announce the release of InScribe v7.12. This version introduces a new **Original Demographics** window, which allows users to view original patient and appointment demographics.

Original Demographics Window

The new **Original Demographics** window displays the patient and appointment demographic data as it was when the job was downloaded in InScribe. This window allows users to compare old and new data after changes have been made.

The **Original Demographics** window can be opened from the View menu or by pressing Alt, then E to open the View menu, then W.

The window allows data to be copied and pasted into the demographics panel or transcription text as needed. Press Tab to navigate through the data fields, Ctrl+Shift+Right Arrow to select text, and Ctrl+C to copy the selected text.

The screenshot shows the InScribe software interface with the 'View' menu open and 'Original Demographics' selected. The 'Original Demographics Preview' window is displayed, showing a comparison of demographic data between the current state and the original state.

Field	Current Data	Original Data
