

DeliverHealth

eScript One Mobile for iOS v3.16 Release Notes

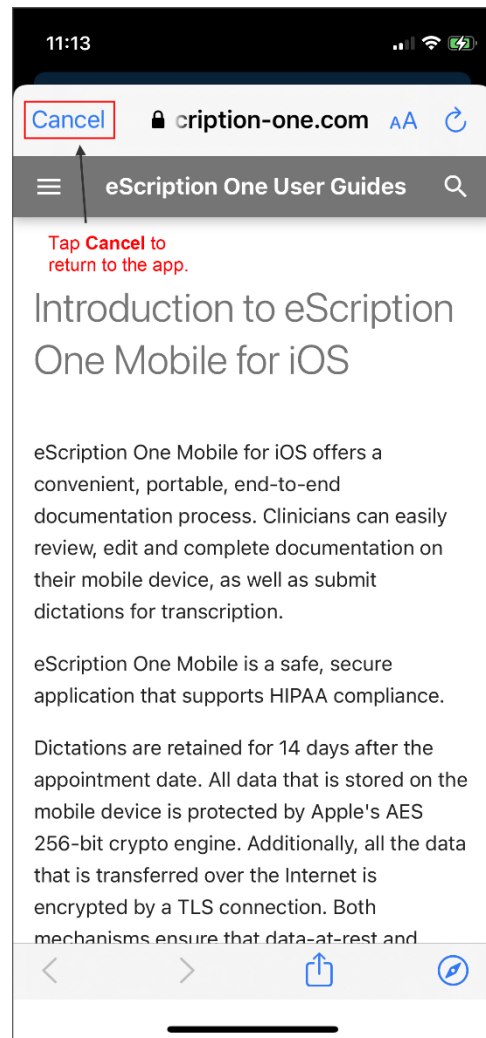

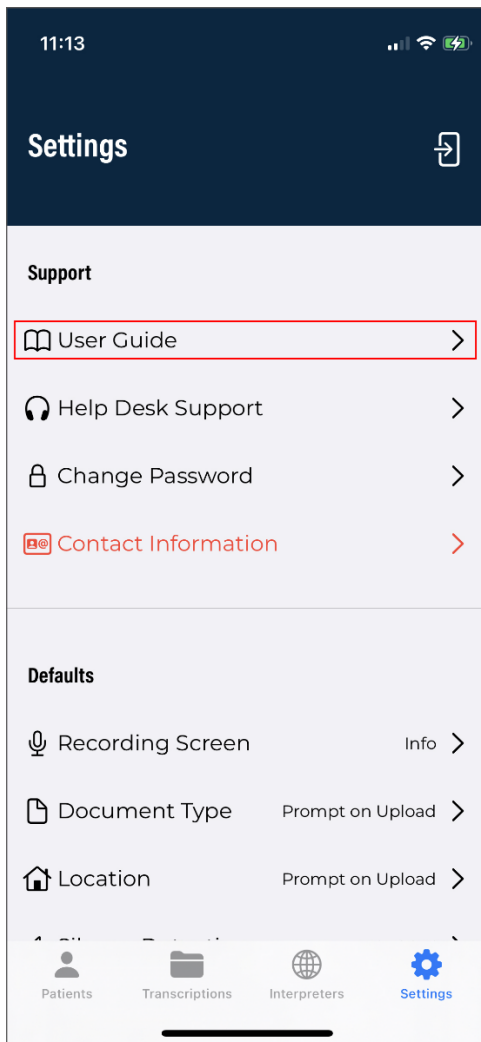

What's new?

DeliverHealth is pleased to announce the release of eScription One Mobile for iOS v3.16. This release includes the ability to view the user guide from within the app, as well as several minor bug fixes.

User Guide Now Opens in App

When viewing the user guide, it will now open within the app rather than in a separate browser window. This will prevent users from being logged out if their organization has disabled the 'resume mobile session' option.

After viewing the guide, tap **Cancel** in the upper left-hand corner.

Application Requirements

- Any iOS device with iOS 15.2 or greater. Open 'Settings' and tap 'About' then 'Software Version' to confirm that the OS installed is version 15.2+.
- Internet Access through a wireless Local Area Network (LAN) connection or through a phone service provider. It is strongly recommended to use a Wi-Fi LAN connection when uploading dictations. Minimum bandwidth: LTE/4G data connection; recommended is stable Wi-Fi.
- Communicates over port 443 to <https://mobile.escription-one.com> using TLS 1.2.
