Inquiry Printing Agent New Notifications Setting Release Notes

What's New?

DeliverHealth is pleased to announce a new setting is available for InQuery Printing Agent users.

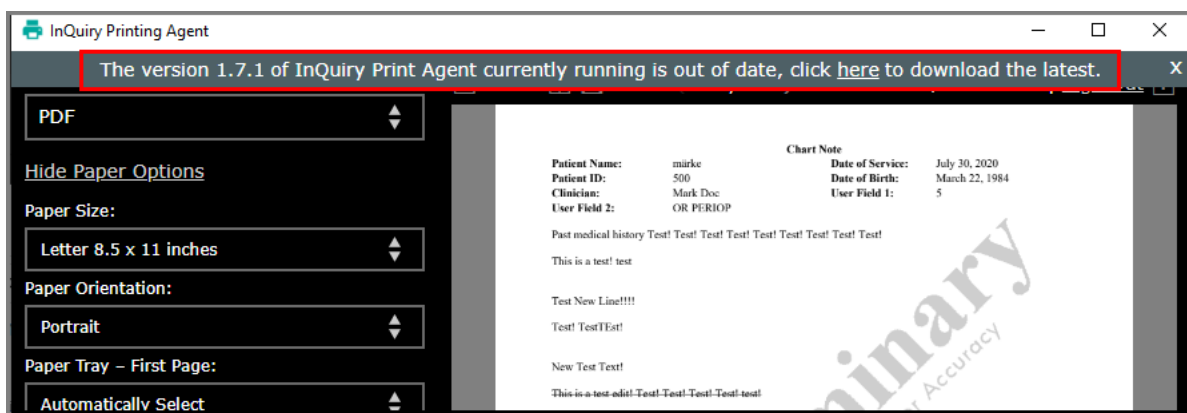

New Notifications Setting

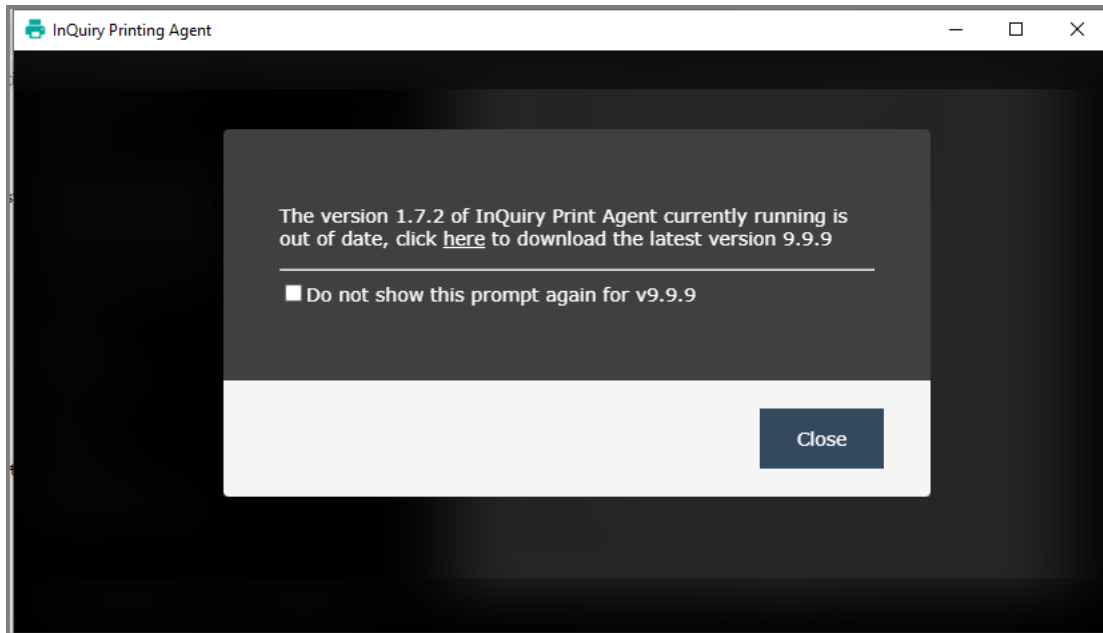

A new client-level setting has been added to InCommand that by default allows users to receive notifications when a new InQuery Printing Agent update is available. If unchecked, InQuery users will not receive notifications about Printing Agent available updates.

The new setting is located on InCommand's Client Maintenance>Maintenance>Client Defaults screen in the Non-Workflow section and is called "Show Printing Update Available Notifications".

Setting	Value
Use Problem List	<input checked="" type="checkbox"/>
License	eScription-One Default
Logging Levels	<input checked="" type="checkbox"/> Log Document View / Print
Envelope Template Style	Emdat Default
Default Print Template Paper Size	A4
Audio Playback Method	Play Dictations in Browser (secure)
Display Dictation Playback Controls in Editor	<input checked="" type="checkbox"/>
Enable Saving Dictations in InSync	<input checked="" type="checkbox"/>
Show Printing Update Available Notifications	<input checked="" type="checkbox"/>

When the option is unchecked, users will not receive the following types of notifications:
