InCommand InVision Reports

Updates to Turnaround Summary Report

Release Notes

What's new?

DeliverHealth is pleased to announce the following updates to InCommand's **Turnaround Summary** Report.

Report Parameter Updates:

- Added the ability to select multiple locations when running the report.
- Added 'Document Type' as a multi-select parameter.

For these parameters, 'All' will be selected by default. To choose specific locations or document types, first select a client in the **Client** drop-down. All options for that client will then appear in the Location or Document Type drop-down. Select the gray check box, then select/de-select which options to include.

The screenshot displays the 'Turnaround Summary' report configuration page. At the top, there is a navigation bar with tabs for 'Emdat', 'OutsourceT Management', 'OutsourceT Maintenance', 'OutsourceT InVision', 'Client Maintenance', and 'InQuery'. Below this is a sub-navigation bar with 'Reports', 'Scheduled Reports', 'Saved Reports', and 'New Report'. The main content area is titled 'Turnaround Summary' and includes a description: 'A statistical summary of turnaround by client and document type for a given date range.' Underneath, there is a 'Report Parameters' section. It contains a 'Client' dropdown menu set to 'ClientPL'. Below the client menu are two multi-select dropdown menus: 'Location' and 'Document Type'. The 'Location' dropdown is open, showing options: 'All' (unchecked), 'Default Location' (checked), 'Loc1' (unchecked), and 'Loc2' (checked). The 'Document Type' dropdown is also open, showing options: 'All' (unchecked), 'Chart Note' (checked), 'Chart Template' (checked), and 'Letter' (unchecked). A red box highlights the 'Location' dropdown, and another red box highlights the 'Document Type' dropdown. A label 'multi-select' with two arrows points to these two dropdowns.

New Column:

- Added a 'Location' column to the report results.

Turnaround Summary

All times are in the time zone of "Central Standard Time"
